SARTHAK ALERIYA

Python Developer | Generative AI | LLMs, RAG & NLP

Email: mr.sarthak14@gmail.com
Phone: +91 6261437404
Location: Indore, M.P.
LinkedIn: linkedin.com/in/sarthak-aleriya-7075b5280

PROFESSIONAL SUMMARY

Python Developer focused on AI-powered applications, Large Language Models (LLMs), Retrieval-Augmented Generation (RAG), Natural Language Processing (NLP), and database-driven automation. Familiar with building AI workflows for document understanding, semantic retrieval, and natural-language access to structured data.

Project experience includes AI-assisted document analysis, retrieval-based question answering, and SQL query generation concepts using Python, REST APIs, LLM integrations, embeddings, and relational databases. Also brings full-stack development experience with REST APIs, frontend applications, and database integration.

WORK EXPERIENCE

Junior Developer — Soft Go Way Technologies, Indore | *Aug 2025 – Present*

- Developed web application features using JavaScript, React.js, Node.js, and REST APIs.
- Worked with relational and NoSQL databases, including SQL Server, MySQL, and MongoDB, for application data and feature requirements.
- Integrated frontend applications with backend APIs and collaborated on feature enhancements, debugging, and application improvements.

PROJECTS

Project 1: AI Chatbot for Data Warehouse

Technologies: *Python, LLMs, RAG, NLP, SQL, FastAPI, Embeddings*

Designed an AI assistant concept to help users ask questions about business data in natural language and receive context-aware answers grounded in warehouse data.

- Outlined a retrieval workflow to bring relevant schema and business context into the LLM prompt.
- Mapped natural-language questions to structured data retrieval and SQL-based answers, with validation before query execution.
- Focused on grounded responses, query safety, and clear explanations of returned results.

Project 2: Text-to-SQL Query Assistant

Technologies: *Python, LLMs, NLP, SQL, FastAPI, PostgreSQL*

Created a project concept for translating natural-language questions into SQL queries so users can explore relational data without writing SQL manually.

- Designed prompts that use database schema and column descriptions to guide SQL generation.
- Included query validation and read-only execution considerations to reduce unsafe or invalid SQL.
- Planned result formatting so generated query outputs are easier to understand.

Project 3: Insurance Claims Document Intelligence & AI Assessment

Technologies: *Python, LLMs, RAG, LangChain, FAISS, FastAPI, OCR*

AI project based on the supplied project document, focused on extracting information from claim documents and retrieving relevant policy context to support assessment.

- Outlined document classification and information-extraction workflows for claim-related files.
- Used a RAG approach to retrieve relevant policy conditions and business rules for context-aware analysis.
- Included missing-document checks and human review for uncertain or exceptional cases.

Project 4: RAG-Based Claims Communication Assistant

Technologies: *Python, NLP, LLMs, RAG, FAISS, FastAPI*

AI project based on the supplied document, focused on analysing claim-related communications and supporting follow-up for missing information.

- Applied NLP concepts to classify messages and identify information or documents that may be missing.
- Used semantic retrieval to surface relevant historical communication and claim context.
- Designed AI-assisted response drafts with human review before sending.

TECHNICAL SKILLS

Programming	Python, SQL, JavaScript, TypeScript
AI & Generative AI	LLMs, Prompt Engineering, RAG, NLP, Text-to-SQL, Context-Aware AI
AI Frameworks & Retrieval	LangChain, Embeddings, Semantic Search, FAISS, Vector Search
Backend & APIs	FastAPI, Flask, REST APIs
Databases	PostgreSQL, MySQL, SQL Server, MongoDB
Data Processing	Data Preprocessing, Structured/Unstructured Data, Information Extraction, OCR Concepts
Tools & Deployment	Git, Docker, CI/CD Fundamentals

EDUCATION

Bachelor of Engineering — Computer Science
Indore Institute of Science and Technology, Indore | May 2024 | CGPA: 8.10 / 10

Senior Secondary (Class XII) — Mathematics
Govt. Boys Higher Secondary School, Rau, Indore | Jul 2020 | 78%

Secondary Education (Class X)
Govt. High School Tihi, MHOW, Indore | Jul 2018 | 90%

CERTIFICATIONS

- JavaScript, HTML & CSS — Duke University | Coursera (Sep 2021)
- Java Placement Training — Universal Informatics, Indore

SOFT SKILLS

Team Player • Multitasking • Time Management • Quick Learner • Problem Solving

LANGUAGES

English — Full Professional Proficiency • Hindi — Native / Bilingual Proficiency
